

Stakeholder Consultation Proforma

Scoping Report for an Environmental Appraisal examining the effects of continuing military training on Dartmoor September 2006

Consultation Process

This Scoping Report is being circulated to stakeholders to invite comments on the proposed methodology and effects to be taken forward into the Environmental Appraisal (EA) process. You are invited to comment on whether any effects that have been scoped out¹ (or omitted) are, in your opinion, likely to have significant effects and should be brought back (or introduced) into the EA process. It would be helpful if you could explain why you feel any such effects are likely to be significant in the context of continued military training on the Dartmoor Training Area. The consultation period will run until **17th November 2006**.

¹ Effects that are 'scoped-out' will not be taken forward into the EA process. Effects that are 'scoped-in' will be taken forward into the EA process. Where there is uncertainty as to whether any effects are likely to be significant these will be taken forward into the EA process until such time as the significance of the effect is determined.
